THE FACTS

- The Kenko PowerPatch features specially configured nodules for massage and Nikken Magnetic Technology, in a convenient size.
- Kenko PowerPatch incorporates a 750-gauss magnet to complement the Earth's magnetic field — a natural phenomenon that is disrupted by man-made surroundings. Magnetic Equalizing Technology was developed by Nikken to offset that effect and help restore the normal balance.
- The nodules on the surface of the magnet also serve to concentrate the magnetic field at these points. The difference between the high and low areas introduces variations in the shape of the magnetic field, producing a greater field depth for more penetration.
- The hexagonal PowerPatch magnet is plated in genuine 24k gold, for a durable, hypoallergenic surface. The adhesive is medical-grade and non-irritating. PowerPatch magnets are reusable, and replacement adhesive discs are included.
